New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) H. Fujita, M. Mejri

Software is the essential enabler for the new economy and science. It creates new markets and new directions for a more reliable, flexible, and robust society. It empowers the exploration of our world in ever more depth. However, software often falls short behind our expectations. Current software methodologies, tools, and techniques remain expensive and not yet reliable for a highly changeable and evolutionary market. Many approaches have been proven only as case-by-case oriented methods. This book presents a number of new trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow's information society. This book is an attempt to capture the essence of a new state of art in software science and its supporting technology. The book also aims at identifying the challenges such a technology has to master. One example that is challenged is Lyee methodology as a new Japanese emerged software methodology that has been patented in several countries in Europe, Asia, and America. But it is still in its early stage of emerging as a new software style. This series will also contribute to elaborate on such new trends and related academic research studies and development.

IOS Press is an international science, technical and medical publisher of high-quality books for academics, scientists, and professionals in all fields.

Some of the areas we publish in:

- Biomedicine
- Oncology
- Artificial intelligence
- Databases and information systems
- Maritime engineering
- Nanotechnology
- Geoengineering
- All aspects of physics
- E-governance
- E-commerce
- The knowledge economy
- Urban studies
- Arms control
- Understanding and responding to terrorism
- Medical informatics
- Computer Sciences

From reader reviews:

Bobby Bagwell:

Do you have favorite book? Should you have, what is your favorite's book? E-book is very important thing for us to know everything in the world. Each publication has different aim as well as goal; it means that e-book has different type. Some people feel enjoy to spend their time and energy to read a book. They are reading whatever they consider because their hobby is definitely reading a book. Consider the person who don't like reading through a book? Sometime, particular person feel need book once they found difficult problem or maybe exercise. Well, probably you will need this New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications).

Toby Terry:

In this 21st century, people become competitive in each way. By being competitive now, people have do something to make them survives, being in the middle of typically the crowded place and notice through surrounding. One thing that at times many people have underestimated that for a while is reading. Sure, by reading a e-book your ability to survive increase then having chance to stand up than other is high. In your case who want to start reading the book, we give you this specific New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) book as nice and daily reading publication. Why, because this book is more than just a book.

Cheryl Reese:

Do you have something that you like such as book? The publication lovers usually prefer to choose book like comic, limited story and the biggest some may be novel. Now, why not striving New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) that give your fun preference will be satisfied through reading this book. Reading practice all over the world can be said as the means for people to know world much better then how they react in the direction of the world. It can't be claimed constantly that reading routine only for the geeky man or woman but for all of you who wants to always be success person. So , for every you who want to start examining as your good habit, it is possible to pick New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) become your own personal starter.

Christopher McCormick:

Many people spending their time period by playing outside having friends, fun activity using family or just watching TV all day every day. You can have new activity to shell out your whole day by reading through a book. Ugh, do you think reading a book will surely hard because you have to accept the book everywhere? It ok you can have the e-book, taking everywhere you want in your Smartphone. Like New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) which is finding the e-book version. So , why not try out this book? Let's find.
