## **Frozen Section Library: Lung: 1** Timothy Craig Allen, Philip T. Cagle

Frozen sections are performed for the purpose of rapid diagnosis while a patient is undergoing surgery, usually under general anesthesia, as a basis for making immediate treatment decisions. Therefore, frozen section diagnosis is often a highly demanding situation for the pathologist who must render a diagnosis quickly and a crucial determination for the patient and surgeon. In addition to the need for rapid recall of differential diagnoses, there are many pitfalls and artifacts that add to the risk of frozen section diagnosis that are not present with permanent sections of fully processed tissues that can be examined in a more leisurely fashion. Most standard pathology textbooks, both general and subspecialty, largely ignore the topic of frozen section. Few textbooks have ever focused exclusively on frozen section diagnosis and those textbooks that have done so are now out-of-date and have limited numbers of black and white figures. None has emphasized the education of the surgeon in terms of frozen section benefits, limitations or proper utilization. The Frozen Section Library series will provide convenient, user-friendly handbooks for each organ system to expedite use in the hurried frozen section situation. These books will be small and light-weight, copiously color illustrated with images of actual frozen sections, highlighting pitfalls, artifacts and differential diagnosis. These books will also include perspectives for the surgeon and for communication with the surgeon and suggest ancillary procedures (for example, when to take tissue for microbiology cultures). Each 5 X 8 book is estimated to be about 200 to 250 pages in toto with 100 to 150 color figures each. As a handbook for practicing pathologists, these books will be indispensable aids to diagnosis and avoiding dangers in one of the most challenging situations that pathologists encounter. Problems, such as differentiation of benign processes from malignant neoplasms which may be more difficult on frozen section than permanent section and which have a serious impact on the surgeon's immediate treatment decisions, will be emphasized. Rapid consideration of differential diagnoses and how to avoid traps caused by frozen section artifacts will be readily accessible to the users of the handbooks. A series of concise, easy-to-use, well-illustrated handbooks alleviates the often frustrating and time-consuming, sometimes futile, process of searching through bulky textbooks that are unlikely to illustrate or discuss pathologic diagnoses from the perspective of frozen sections in the first place. Tables and charts will provide guidance for differential diagnosis of various histologic patterns. The advantages of a series of organ-specific handbooks, in addition to the ease-of-use and manageable size, is that (1) it allows more comprehensive coverage of more diagnoses, both common and rare, than a single volume that tries to highlight a limited number of diagnoses for each organ and (2) it allows more detailed insight by permitting experienced authorities to emphasize the peculiarities of frozen section for each organ system. Although some differences in practice of frozen section exist between different institutions, such as differing policies regarding whether or not to perform frozen section on specific types of specimens, these differences are generally not significant and can be discussed (in an organ-specific handbook by an expert in that organ system permits more opportunity for this type of discussion). Touch preparations, which are used for some organs such as central nervous system or thyroid more often than others, will be appropriately emphasized and illustrated according to the need for each specific organ. This series will be highly valuable to practicing surgical pathologists, both community a

### **From reader reviews:**

#### **Ira Knudsen:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite publication and reading a e-book. Beside you can solve your condition; you can add your knowledge by the guide entitled Frozen Section Library: Lung: 1. Try to make the book Frozen Section Library: Lung: 1 as your buddy. It means that it can for being your friend when you experience alone and beside those of course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you more confidence because you can know everything by the book. So , we need to make new experience as well as knowledge with this book.

#### **James Harris:**

Often the book Frozen Section Library: Lung: 1 has a lot info on it. So when you read this book you can get a lot of help. The book was published by the very famous author. This articles author makes some research ahead of write this book. This particular book very easy to read you can get the point easily after reading this book.

#### **Robert Marshall:**

Do you like reading a e-book? Confuse to looking for your chosen book? Or your book ended up being rare? Why so many concern for the book? But any kind of people feel that they enjoy for reading. Some people likes studying, not only science book but in addition novel and Frozen Section Library: Lung: 1 or maybe others sources were given understanding for you. After you know how the truly great a book, you feel would like to read more and more. Science reserve was created for teacher or maybe students especially. Those textbooks are helping them to bring their knowledge. In different case, beside science reserve, any other book likes Frozen Section Library: Lung: 1 to make your spare time a lot more colorful. Many types of book like this one.

#### **Crystal Babin:**

What is your hobby? Have you heard which question when you got students? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And you know that little person similar to reading or as looking at become their hobby. You must know that reading is very important and also book as to be the point. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You will find good news or update with regards to something by book. Many kinds of books that can you choose to adopt be your object. One of them are these claims Frozen Section Library: Lung: 1.
