## **Grammatical Inference: Theoretical Results and Applications: 10th International Colloquium, ICGI 2010, Valencia, Spain, September 13-16, 2010. Proceedings (Lecture Notes in Computer Science)**

The first edition of the International Colloquium on Grammatical Inference (ICGI) was held in Essex (United Kingdom) in 1993. After the success of this meeting there have been eight more editions that have been hosted by different academic institutions across the world: Alicante (Spain, 1994), Montpellier (France, 1996), Ames, Iowa (USA, 1998), Lisbon (Portugal, 2000), Amsterdam (The Netherlands, 2002), Athens (Greece, 2004), Tokyo (Japan, 2006) and Saint-Malo (France, 2008). ICGI 2010 was held in Valencia (Spain) during September 13-16. It was organized by the Research Group on Formal Language Theory, Computability and Complexity from the Technical University of Valencia. This was the tenth edition of ICGI, which is a nice number for celebrations. Ten editions is a sign of good health for any conference. In the case of Grammatical Inference, it means that the topics, problems and applications of this research area are alive and serve as a good framework to study related aspects of artificial intelligence, natural language processing, formal language theory, computability and complexity, bioinformatics, pattern recognition, etc. There were two reviews and local discussions among the members of the Program Committee (PC) in order to evaluate every work proposed to the conference. This volume contains the texts of 32 papers presented at ICGI 2010. They are divided into two groups of works. There are 18 regular papers (out of 25) and 14 short papers (11 out of 15, and three regular papers proposed as short ones). The topics of the papers range from theoretical results about the learning of different formal language classes (regular, context-free, context-sensitive, etc.) to application papers on bioinformatics, language modelling, software engineering, etc.
