Teaching Children Science: A Discovery Approach (7th Edition)

Joseph A. Abruscato, Don A. DeRosa

Teaching Children Science: A Discovery Approach (7th Edition) Joseph A. Abruscato, Don A. DeRosa Science is a quest for explanations. This popular text continues to encourage teachers to help their students learn through discovery, while also providing content on the latest techniques in science teaching. This edition has been thoroughly revised and features a new co-author, Dr. Donald DeRosa of Boston University and a larger trim size and paperback binding for a fresher, more open feel.

The book continues to use its well-regarded pedagogy to help students to learn science. They are:

- **A Look Ahead**—topics to be discussed in the chapter
- **Make the Case**—A reflective exercise that can be done individually or as a group.
- **Summary**—A review of the main ideas in the chapter.
- **Going Further**—Learning activities for further study
- **Resources for Discovery Learning**—A listing of websites, books, and articles for further reference.

This establishes a solid foundation in science pedagogy upon which they can build in later years.

The 5 E's of Learning and Universal Design for Learning have been added to this edition and every chapter correlates to the NSE Content Standards. A new chapter on using technology in the classroom continues to build on the authors' belief that technology can enhance learning in the science classroom. The new package includes links to video and web resources on the MyEducationLab website.

New To This Edition:

NEW! Features a new co-author in this edition—Dr. Donald DeRosa of Boston University.

NEW! A new paperback binding and larger 8 ½" x 11" trim size gives the book a fresher and more open feel.

NEW! Includes a new chapter (Chapter 8) *Using Technology to Enhance Science Learning*.

NEW! Gives an increased focus on technology/multimedia, engineering, and energy conservation—Includes a new Part IV on The Technological Sciences and more earth-friendly and “green” science activities in this edition.

NEW! Fully integrated package--Each chapter correlates to video and web resources within the MyEducationLab website.

- The MyLab series from Pearson offers innovative homework, student assessment, and multimedia instructional tools designed to enrich the learning experience and improve course outcomes. With detailed gradebook and customization options, instructors can easily monitor student progress and save valuable time.

NEW! Includes *The 5 E's Learning Cycle*--The 5 E's learning cycle is an instructional design model that presents a framework for constructivist learning theories that can be effectively used in teaching science.

- **Engage**--The task is introduced. Using connections to past learning, demonstrations of an event, and asking pointed questions, the teacher can spark the students' interest right away.
- **Explore**--While the teacher facilitates, students take part in hands-on activities that allow them to work with materials. Questioning, sharing and communication with other learners should be encouraged during this stage.
- **Explain**--Here the focus is on analysis. Students are encouraged to put observations, questions, hypotheses, and experiences into language. Communication between students and groups will aid student learning. Again, the teacher is the facilitator, leading discussions, asking questions, giving definitions, of helping students find the right words to describe their experiences.
- **Elaborate/Extend**--Now students should be encouraged build and expand upon what they have learned so far, making deductions and inferences. They can apply what they have learned to real world situations.
- **Evaluate**--Evaluation should be ongoing and should occur at all stages, in order to determine that learning objectives have been met. The teacher can use any assessment tool that they deem appropriate. At this time the teacher should encourage further study that builds upon what has been learned.

NEW! *Universal Design for Learning* will be incorporated in Chapter 9 *Adapting the Science*

Curriculum-- Universal design is an approach to designing course instruction, materials, and content to benefit students of all learning styles.

- Universal design provides equal access to learning, not simply equal access to information. This design model allows the student to control the method of accessing information while the teacher monitors the learning process and initiates any beneficial methods. Although this design enables the student to be self-sufficient, the teacher is still responsible for imparting knowledge and facilitating the learning process. The classroom becomes a positive learning experience for all students while minimizing the appearance that special accommodations are being made for any individual student.

NEW! Reorganizes Parts II through IV to be more reader-friendly--The "A" and "B" subchapters of the previous edition will be broken out into content chapters and activities chapters.

NEW! Teaches novice instructors how to differentiate among good and bad science kits and how to utilize them effectively in the classroom.

From reader reviews:

Esther Price:

This Teaching Children Science: A Discovery Approach (7th Edition) book is not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is actually information inside this book incredible fresh, you will get info which is getting deeper you actually read a lot of information you will get. This particular Teaching Children Science: A Discovery Approach (7th Edition) without we recognize teach the one who examining it become critical in considering and analyzing. Don't end up being worry Teaching Children Science: A Discovery Approach (7th Edition) can bring if you are and not make your bag space or bookshelves' turn into full because you can have it inside your lovely laptop even cellphone. This Teaching Children Science: A Discovery Approach (7th Edition) having excellent arrangement in word and also layout, so you will not sense uninterested in reading.

Donna Young:

Your reading sixth sense will not betray an individual, why because this Teaching Children Science: A Discovery Approach (7th Edition) reserve written by well-known writer we are excited for well how to make book that may be understand by anyone who all read the book. Written within good manner for you, still dripping wet every ideas and writing skill only for eliminate your own hunger then you still hesitation Teaching Children Science: A Discovery Approach (7th Edition) as good book not just by the cover but also through the content. This is one book that can break don't determine book by its handle, so do you still needing another sixth sense to pick this kind of!? Oh come on your examining sixth sense already alerted you so why you have to listening to an additional sixth sense.

Kathleen Duff:

Many people spending their period by playing outside using friends, fun activity along with family or just watching TV the entire day. You can have new activity to enjoy your whole day by looking at a book. Ugh, do you consider reading a book really can hard because you have to take the book everywhere? It ok you can have the e-book, getting everywhere you want in your Smartphone. Like Teaching Children Science: A Discovery Approach (7th Edition) which is obtaining the e-book version. So , try out this book? Let's find.

Ronnie Chaney:

What is your hobby? Have you heard which question when you got college students? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person including reading or as looking at become their hobby. You should know that reading is very important and book as to be the matter. Book is important thing to increase you knowledge, except your current teacher or lecturer. You get good news or update about something by book. A substantial number of sorts of books that can you choose to use be your object. One of them are these claims Teaching Children Science: A Discovery Approach (7th Edition).
