Machine Language for Beginners Richard Mansfield

Although anyone wishing to learn 6502 machine language (ML) will likely find this book instructive and worthwhile, the specific example programs are written to work on five popular personal computers: Apple, Atari, VIC, Commodore 64, and the PET/CBMs. If your computer uses the 6502 microprocessor, but is not one of these machines, you will need to find a "memory map" for your particular machine. These maps - widely available in books and magazines, and from user groups - will allow you to follow and practice with the examples of 6502 machine language throughout this book.
