## **Research Handbook on the Economics of Family Law (Research Handbooks in Law and Economics Series)** Lloyd R. Cohen, Joshua D. Wright

Those not learned in the economic arts believe that economics is either solely or essentially concerned with commercial relations. And, so it was, originally. Then, in the second half of the 20th century, economists began applying their minimalist but sturdy tools to other human activities such as marriage, child-bearing, crime, religion and social groups.

In this spirit, the *Research Handbook on the Economics of Family Law* gives us a series of original essays by distinguished scholars in economics, law or both. The essays represent a variety of approaches to the field. Many contain extensive surveys of the literature with respect to the particular question they address. Some employ empirical economics, others are more narrowly legal. They have in common one thing: each scholar employs a core economic tool or insight to shed light on some aspect of family law and social institutions broadly understood. Topics covered include: divorce, child support, infant feeding, abortion access, prostitution, the decline in marriage, birth control and incentives for partnering.

This comprehensive and enlightening volume will be a valuable reference for those interested in law and economics generally and family law in particular.
