An Introduction to Human-Environment Geography: Local Dynamics and Global Processes William G. Moseley, Eric Perramond, Holly M. Hapke, Paul Laris

This introductory level text explores various theoretical approaches to human-environment geography, demonstrating how local dynamics and global processes influence how we interact with our environments.

- Introduces students to fundamental concepts in environmental geography and science
- Explores the core theoretical traditions within the field, along with major thematic issues such as population, food and agriculture, and water resources
- Offers an engaging and unique view of the spatial relationships between humans and their environment across geographical locations around the world
- Includes a variety of real-world policy questions and emphasizes geography's strong tradition of field work by featuring prominent nature-society geographers in guest field notes
