South American and Antarctic Continental Cenozoic Birds: Paleobiogeographic Affinities and Disparities (SpringerBriefs in Earth System Sciences) Claudia P. Tambussi, Federico Degrange

Modern birds (Neornithes) are represented by two big lineages, the Palaeognathae (Tinamiformes + Ratitae) and the Neognathae [Galloanserae + Neoaves (Metaves + Coronoaves)]. Both clades sum approximately 10,000 species of which 60% are Passeriformes (the most diverse clade of terrestrial vertebrates). A comparison between the past and the present reveals a complex and hallmarked evolutionary and biogeographic history which would have begun over 65 million years ago. For South America (SA) this includes: (1) the presence of taxa with uncertain affinities and the absence of Passeriformes during the Paleogene; (2) a progressive and accelerated increase of the species starting at the Neogene (Miocene); (3) important extinct lineages (e.g. Phorusrhacidae, Teratornithidae) that migrate to North America after the rising of the Panamá isthmus; (4) groups with major diversification in the Neogene that survives nowadays represented by scarce species endemic of SA (Cariamidae) or that inhabits mainly in the southern hemisphere (Anhingidae); (5) very diverse living groups with scarce (e.g., Passeriformes) or none (e.g., Apodiformes) fossil record in SA, which stem-groups are registered in Europe. Apparently, the changes in diversity of the south American Neornithes have been the result of successive radiation, biogeographic connections with North America and in a minor scale, some extinctions. The opening of the Drake's passage and the occurrence of the circumpolar Antarctic flow are not sufficient causes to explain the highly disparity between the weddellians penguins (Sphenisciformes) of Antarctica and those of the patagonian Atlantic Ocean.

From reader reviews:

Clifford Hudgins:

The ability that you get from South American and Antarctic Continental Cenozoic Birds: Paleobiogeographic Affinities and Disparities (SpringerBriefs in Earth System Sciences) could be the more deep you excavating the information that hide inside the words the more you get considering reading it. It doesn't mean that this book is hard to be aware of but South American and Antarctic Continental Cenozoic Birds: Paleobiogeographic Affinities and Disparities (SpringerBriefs in Earth System Sciences) giving you joy feeling of reading. The author conveys their point in certain way that can be understood simply by anyone who read the idea because the author of this guide is well-known enough. This particular book also makes your personal vocabulary increase well. That makes it easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having that South American and Antarctic Continental Cenozoic Birds: Paleobiogeographic Affinities and Disparities (SpringerBriefs in Earth System Sciences) instantly.

Donald Sams:

Are you kind of active person, only have 10 or even 15 minute in your time to upgrading your mind expertise or thinking skill even analytical thinking? Then you are having problem with the book when compared with can satisfy your short space of time to read it because all this time you only find book that need more time to be learn. South American and Antarctic Continental Cenozoic Birds: Paleobiogeographic Affinities and Disparities (SpringerBriefs in Earth System Sciences) can be your answer because it can be read by an individual who have those short time problems.

Jennifer Trojanowski:

The book untitled South American and Antarctic Continental Cenozoic Birds: Paleobiogeographic Affinities and Disparities (SpringerBriefs in Earth System Sciences) contain a lot of information on it. The writer explains the woman idea with easy technique. The language is very simple to implement all the people, so do not really worry, you can easy to read that. The book was compiled by famous author. The author gives you in the new period of time of literary works. It is easy to read this book because you can keep reading your smart phone, or gadget, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site in addition to order it. Have a nice go through.

Christopher Evan:

Publication is one of source of knowledge. We can add our knowledge from it. Not only for students but also native or citizen want book to know the up-date information of year to be able to year. As we know those guides have many advantages. Beside most of us add our knowledge, also can bring us to around the world. With the book South American and Antarctic Continental Cenozoic Birds: Paleobiogeographic Affinities and

Disparities (SpringerBriefs in Earth System Sciences) we can have more advantage. Don't that you be creative people? To get creative person must love to read a book. Only choose the best book that ideal with your aim. Don't always be doubt to change your life with that book South American and Antarctic Continental Cenozoic Birds: Paleobiogeographic Affinities and Disparities (SpringerBriefs in Earth System Sciences). You can more appealing than now.
