## Conditioned Taste Aversion: Neural and Behavioral Processes

Conditioned taste aversion is arguably the most important learning process that humans and animals possess because it prevents the repeated self-administration of toxic food. It has not only profoundly influenced the content and direction of learning theory, but also has important human nutritional and clinical significance. In addition to its direct relevance to food selection, dietary habits, and eating disorders, it is significant for certain clinical populations that develop it as a consequence of their treatment. The study of conditioned taste aversions has invigorated new theory and research on drug conditioning and addictions, as well as on conditioned immunity. There has also been a substantial amount of recent research exploring the neural substrates of conditioned taste aversion--its neuroanatomy, pharmacology, and role in the molecular and cellular basis of plasticity.

This book provides a definitive perspective on the current state of research, theory, and clinical applications for conditioned taste aversion effects and methodology. In each chapter, a leading scholar in the field presents a broad range of studies, along with current findings on the topic, highlighting both the major theoretical landmarks and the significant new perspectives. It will be an important resource for both professional and student researchers, who study conditioning, learning, plasticity, eating disorders, and dietary and ingestive behaviors in neuroscience, cognitive neuroscience, cognitive psychology, developmental psychology, clinical psychology, psychopharmacology, and medicine.

### From reader reviews:

#### **Glen Hoffman:**

Have you spare time to get a day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent their very own spare time to take a wander, shopping, or went to typically the Mall. How about open as well as read a book titled Conditioned Taste Aversion: Neural and Behavioral Processes? Maybe it is being best activity for you. You realize beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have additional opinion?

#### **Jared Williams:**

Typically the book Conditioned Taste Aversion: Neural and Behavioral Processes has a lot associated with on it. So when you make sure to read this book you can get a lot of benefit. The book was compiled by the very famous author. The writer makes some research ahead of write this book. That book very easy to read you can obtain the point easily after reading this book.

#### **Sarah Jackson:**

Do you like reading a publication? Confuse to looking for your selected book? Or your book had been rare? Why so many issue for the book? But virtually any people feel that they enjoy to get reading. Some people likes reading, not only science book and also novel and Conditioned Taste Aversion: Neural and Behavioral Processes or even others sources were given understanding for you. After you know how the good a book, you feel wish to read more and more. Science guide was created for teacher as well as students especially. Those publications are helping them to include their knowledge. In some other case, beside science guide, any other book likes Conditioned Taste Aversion: Neural and Behavioral Processes to make your spare time much more colorful. Many types of book like here.

#### **Tia Sargent:**

Reading a e-book make you to get more knowledge from that. You can take knowledge and information from the book. Book is created or printed or illustrated from each source which filled update of news. On this modern era like currently, many ways to get information are available for you. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, book and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just trying to find the Conditioned Taste Aversion: Neural and Behavioral Processes when you essential it?
