**Does your metabolism feel like it is in slow motion? Do you want a fast metabolism?**

### **Metabolism Boosting Tips & Recipes**

You know the drill. You follow a low-carb, low-fat, Paleo, vegan or whatever else diet, sometimes losing weight, but typically something doesn't work. Though you seem to be ticking off all the boxes, you reach a plateau and the fat just doesn't seem to budge. In frustration, you resign yourself to the fact that you simply weren't blessed with a "*fast metabolism*" and may as well give up.

What is a **fast metabolism** mean anyway? It means you efficiently burn the calories you ingest whether that is during training or resting. When you have a slow metabolism, you do not see the results you would expect from eating healthy and focusing on exercise. If you are experiencing the latter, then this book is for you.

### **Rock That Metabolism**

With a strong and healthy *metabolism*, your body is lean, resilient and primed to burn fat for fuel. Without having to resort to snake-oil supplements or difficult-to-follow meal plans, you can start today to unlock your body's natural capacity to be lean and healthy.

This book looks at simple and practical methods that anyone can use to start working with their metabolism instead of against it. You will discover:

- exactly how your metabolism works - and how to use that knowledge to burn fat
- which foods are really going to help with weight loss and which are simply over-hyped health fads
- precisely how to manipulate and encourage the metabolism you were born with to use the food you eat efficiently
- how men and women's metabolisms differ, and what you can do make sure your diet and exercise regime are tailored to your body
- how your lifestyle may be undermining your weight loss efforts and hone in on the psychological and behavioral reasons you may not be losing weight

- why inflammation and stress are your worst enemy when it comes to fat loss, and how to take control of your cortisol production before it sabotages your weight loss goals

Now you can discover the secrets of that skinny person who seems to be able to eat whatever they want without getting fat. They aren't "blessed" with a **fast metabolism**, they simply know exactly how to eat and exercise to keep their physique in peak, fat burning condition. Celebrities, nutritionists and trainers alike have exploited these same metabolism rules to melt fat and feel great.
