Production System Models of Learning and Development (Computational Models of Cognition and Perception) P. Langley, R. Neches

Cognitive psychologists have found the production systems class of computer simulation models to be one of the most direct ways to cast complex theories of human intelligence. There have been many scattered studies on production systems since they were first proposed as computational models of human problem-solving behavior by Allen Newell some twenty years ago, but this is the first book to focus exclusively on these important models of human cognition, collecting and giving many of the best examples of current research. In the first chapter, Robert Neches, Pat Langley, and David Klahr provide an overview of the fundamental issues involved in using production systems as a medium for theorizing about cognitive processes, emphasizing their theoretical power. The remaining chapters take up learning by doing and learning by understanding, discrimination learning, learning through incremental refinement, learning by chunking, procedural learning, and learning by composition. A model of cognitive development called BAIRN is described, and a final chapter reviews John Anderson's ACT theory and discusses how it can be used in intelligent tutoring systems, including one that teaches LISP programming skills. In addition to the editors, the contributors are Yuichiro Anzai (Hokkaido University, Japan), Paul Rosenbloom (Stanford) and Allen Newell (Carnegie-Mellon), Stellan Ohlsson (University of Pittsburgh), Clayton Lewis (University of Colorado, Boulder), Iain Wallace and Kevin Bluff (Deakin University, Australia), and John Anderson (Carnegie-Mellon). David Klahr is Professor and Head of the Department of Psychology at Carnegie-Mellon University. Pat Langley is Associate Professor, Department of Information and Computer Science, University of California, Irvine, and Robert Neches is Research Computer Scientist at University of Southern California Information Sciences Institute. Production System Models of Learning and Development is included in the series Computational Models of Cognition and Perception, edited by Jerome A. Feldman, Patrick J. Hayes, and David E. Rumelhart. A Bradford Book.

From reader reviews:

Alan Castorena:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each e-book has different aim or goal; it means that book has different type. Some people sense enjoy to spend their time and energy to read a book. They are reading whatever they acquire because their hobby will be reading a book. What about the person who don't like looking at a book? Sometime, particular person feel need book whenever they found difficult problem or maybe exercise. Well, probably you'll have this Production System Models of Learning and Development (Computational Models of Cognition and Perception).

Betty Edmond:

This Production System Models of Learning and Development (Computational Models of Cognition and Perception) book is not really ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is information inside this guide incredible fresh, you will get facts which is getting deeper you actually read a lot of information you will get. This Production System Models of Learning and Development (Computational Models of Cognition and Perception) without we realize teach the one who studying it become critical in imagining and analyzing. Don't become worry Production System Models of Learning and Development (Computational Models of Cognition and Perception) can bring when you are and not make your handbag space or bookshelves' grow to be full because you can have it inside your lovely laptop even cellphone. This Production System Models of Learning and Development (Computational Models of Cognition and Perception) having fine arrangement in word in addition to layout, so you will not experience uninterested in reading.

Darlene Gutierrez:

Do you considered one of people who can't read satisfying if the sentence chained within the straightway, hold on guys this specific aren't like that. This Production System Models of Learning and Development (Computational Models of Cognition and Perception) book is readable by you who hate those straight word style. You will find the data here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to deliver to you. The writer associated with Production System Models of Learning and Development (Computational Models of Cognition and Perception) content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the content but it just different available as it. So , do you even now thinking Production System Models of Learning and Development (Computational Models of Cognition and Perception) is not loveable to be your top record reading book?

Roger Richmond:

Would you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try and

pick one book that you never know the inside because don't determine book by its deal with may doesn't work at this point is difficult job because you are frightened that the inside maybe not because fantastic as in the outside search likes. Maybe you answer could be Production System Models of Learning and Development (Computational Models of Cognition and Perception) why because the great cover that make you consider about the content will not disappoint an individual. The inside or content is fantastic as the outside or maybe cover. Your reading 6th sense will directly direct you to pick up this book.
