Neuropsychological Rehabilitation: Proceedings of the Conference on Rehabilitation of Brain Damaged People: Current Knowledge and Future Directions, held at Copenhagen, June 15-16, 1987

In early 1985 a grant from the Egmont Foundation made the establishment of the Center for Rehabilitation of Brain Damage in Copenhagen possible. This meant the realization of a plan with which Anne-Lise Christensen had been occupied for years. Through her work in psychiatric and neurosurgical wards she had acquired a deep insight in the problems of the brain damage, and through visits to the leading centers within the field of brain damage rehabilitation she had become intimately acquainted with the most modern trends in research and practice which was insufficiently developed in Denmark. When finally the possibility of establishing the center came closer, it was obvious that Anne-Lise Christensen would be the right person to organize this institution and to become its leader. Two years later, when the building-up of the Center had been finished and the work was running smoothly, it was felt natural to mark this accomplishment by the arrangement of an international conference on rehabilitation of brain damage. On this occasion, a number of leading specialists gave lectures on many different aspects of the topic. This provided great incentives for those interested in the field in Denmark. The present volume, containing the lectures from the conference, can also be regarded as a tribute to Anne-Lise Christensen and her colleagues, in recognition of their accomplishments within the field of neuropsychology and rehabilitation of the brain damaged.
