Software Product-Line Engineering: A Family-Based Software Development Process David M. Weiss, Chi Tau Robert Lai

It is in the "how to do it" part that this book excels, because it illustrates a process that has been successfully applied to reduce costs for organizations that develop large programming systems. With the help of this book, many more can learn how to exploit the idea of program families and bring about a substantial improvement in the state of practice in the software industry. --David Lorge Parnas Many organizations have mastered the practice of software development, yet few have become truly efficient at software production. With the adoption of an efficient, systematic software production method, organizations can gain significant competitive advantages, including reduced time to market, better schedule predictability, more reliable code, and decreased costs. Software Product-Line Engineering provides the actionable information and proven tactics necessary to effect organizational change and make your future software projects more successful. The authors outline a systematic method for rapid software production through the FAST (Family-Oriented Abstraction, Specification, and Translation) process, a revolutionary commercial product developed at AT&T that continues to evolve at Lucent Technologies. FAST uses practical domain engineering to decrease the time and effort necessary to develop, deliver, and maintain software. Any software development projects currently using C, C++, or Java can easily incorporate the FAST model and quickly reap the benefits of a more efficient software methodology. 0201694387B04062001

From reader reviews:

Winston Nakashima:

What do you about book? It is not important along with you? Or just adding material if you want something to explain what your own problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have extra time? What did you do? Everyone has many questions above. They have to answer that question simply because just their can do that. It said that about publication. Book is familiar in each person. Yes, it is correct. Because start from on jardín de infancia until university need this Software Product-Line Engineering: A Family-Based Software Development Process to read.

Karen Partain:

This Software Product-Line Engineering: A Family-Based Software Development Process book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is actually information inside this book incredible fresh, you will get data which is getting deeper you read a lot of information you will get. This particular Software Product-Line Engineering: A Family-Based Software Development Process without we recognize teach the one who studying it become critical in thinking and analyzing. Don't be worry Software Product-Line Engineering: A Family-Based Software Development Process can bring when you are and not make your case space or bookshelves' grow to be full because you can have it with your lovely laptop even telephone. This Software Product-Line Engineering: A Family-Based Software Development Process having excellent arrangement in word and also layout, so you will not truly feel uninterested in reading.

Frederick Roark:

Reading can called thoughts hangout, why? Because if you are reading a book mainly book entitled Software Product-Line Engineering: A Family-Based Software Development Process your mind will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely can become your mind friends. Imaging every word written in a publication then become one contact form conclusion and explanation which maybe you never get previous to. The Software Product-Line Engineering: A Family-Based Software Development Process giving you an additional experience more than blown away your head but also giving you useful data for your better life within this era. So now let us explain to you the relaxing pattern this is your body and mind is going to be pleased when you are finished reading through it, like winning a sport. Do you want to try this extraordinary paying spare time activity?

Lillian Burbank:

Many people spending their time frame by playing outside having friends, fun activity with family or just watching TV the entire day. You can have new activity to spend your whole day by looking at a book. Ugh, do you think reading a book really can hard because you have to take the book everywhere? It fine you can

have the e-book, bringing everywhere you want in your Touch screen phone. Like Software Product-Line Engineering: A Family-Based Software Development Process which is keeping the e-book version. So , why not try out this book? Let's observe.
