Sheaves and Functions Modulo p : Lectures on the Woods Hole Trace Formula (London Mathematical Society Lecture Note Series) Lenny Taelman

The Woods Hole trace formula is a Lefschetz fixed-point theorem for coherent cohomology on algebraic varieties. It leads to a version of the sheaves-functions dictionary of Deligne, relating characteristic- p -valued functions on the rational points of varieties over finite fields to coherent modules equipped with a Frobenius structure. This book begins with a short introduction to the homological theory of crystals of Böckle and Pink with the aim of introducing the sheaves-functions dictionary as quickly as possible, illustrated with elementary examples and classical applications. Subsequently, the theory and results are expanded to include infinite coefficients, L-functions, and applications to special values of Goss L-functions and zeta functions. Based on lectures given at the Morningside Center in Beijing in 2013, this book serves as both an introduction to the Woods Hole trace formula and the sheaves-functions dictionary, and to some advanced applications on characteristic p zeta values.

From reader reviews:

Jamie Lundquist:

The book Sheaves and Functions Modulo p : Lectures on the Woods Hole Trace Formula (London Mathematical Society Lecture Note Series) make one feel enjoy for your spare time. You may use to make your capable a lot more increase. Book can to become your best friend when you getting tension or having big problem together with your subject. If you can make studying a book Sheaves and Functions Modulo p : Lectures on the Woods Hole Trace Formula (London Mathematical Society Lecture Note Series) to get your habit, you can get far more advantages, like add your current capable, increase your knowledge about a few or all subjects. You may know everything if you like open and read a reserve Sheaves and Functions Modulo p : Lectures on the Woods Hole Trace Formula (London Mathematical Society Lecture Note Series). Kinds of book are a lot of. It means that, science book or encyclopedia or some others. So , how do you think about this reserve?

Lindsey Putman:

People live in this new day of lifestyle always make an effort to and must have the free time or they will get lot of stress from both lifestyle and work. So , whenever we ask do people have time, we will say absolutely yes. People is human not only a robot. Then we request again, what kind of activity do you have when the spare time coming to you of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative within spending your spare time, often the book you have read is actually Sheaves and Functions Modulo p : Lectures on the Woods Hole Trace Formula (London Mathematical Society Lecture Note Series).

Sharon Keller:

The book untitled Sheaves and Functions Modulo p : Lectures on the Woods Hole Trace Formula (London Mathematical Society Lecture Note Series) contain a lot of information on this. The writer explains the girl idea with easy technique. The language is very straightforward all the people, so do not worry, you can easy to read the item. The book was published by famous author. The author will bring you in the new time of literary works. It is possible to read this book because you can read more your smart phone, or device, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and order it. Have a nice read.

May Davidson:

That e-book can make you to feel relax. This specific book Sheaves and Functions Modulo p : Lectures on the Woods Hole Trace Formula (London Mathematical Society Lecture Note Series) was colourful and of course has pictures on the website. As we know that book Sheaves and Functions Modulo p : Lectures on the Woods Hole Trace Formula (London Mathematical Society Lecture Note Series) has many kinds or genre. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and think

you are the character on there. Therefore , not at all of book tend to be make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading that will.
