Wireless Internet Security: Architecture and Protocols

James Kempf

Wireless Internet Security: Architecture and Protocols James Kempf

Approaching wireless Internet security from the position of system architecture, this text describes the cryptographic and protocol-based tools for Internet security with a focus on understanding the system architecture of existing Internet security, and on developing architectural changes for new security services. Introducing the topics of security threats in wireless networks, security services for countering those threats, and the process of defining functional architecture for network systems, the author also discusses examples of wireless Internet security systems such as wireless network access control, local IP subnet configuration and address resolution, and location privacy. Each chapter describes the basic network architecture and protocols for the system under consideration, the security threats faced, a functional architecture, and the important Internet protocols that implement the architecture. This is an ideal resource for graduate students of electrical engineering and computer science, as well as for engineers and system architects in the wireless network industry.

From reader reviews:

Eva Burton:

What do you regarding book? It is not important along? Or just adding material when you require something to explain what yours problem? How about your spare time? Or are you busy person? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have time? What did you do? Every individual has many questions above. They need to answer that question mainly because just their can do that. It said that about book. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need this particular Wireless Internet Security: Architecture and Protocols to read.

Alice Myers:

This Wireless Internet Security: Architecture and Protocols is great book for you because the content that is full of information for you who else always deal with world and also have to make decision every minute. This kind of book reveal it info accurately using great plan word or we can say no rambling sentences inside. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but hard core information with attractive delivering sentences. Having Wireless Internet Security: Architecture and Protocols in your hand like keeping the world in your arm, data in it is not ridiculous just one. We can say that no e-book that offer you world throughout ten or fifteen tiny right but this reserve already do that. So , this really is good reading book. Hi Mr. and Mrs. busy do you still doubt that?

Robbie Lewis:

As we know that book is essential thing to add our expertise for everything. By a publication we can know everything we wish. A book is a set of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This reserve Wireless Internet Security: Architecture and Protocols was filled regarding science. Spend your extra time to add your knowledge about your research competence. Some people has various feel when they reading the book. If you know how big selling point of a book, you can feel enjoy to read a publication. In the modern era like right now, many ways to get book that you wanted.

Douglas Brim:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is written or printed or created from each source which filled update of news. With this modern era like at this point, many ways to get information are available for an individual. From media social including newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just searching for the Wireless Internet Security: Architecture and Protocols when you needed it?
